

# Sustainable Reservoir Development and Management

*by the IAHS/ICWRS Project Team*  
(July 1993–July 1998)

Edited by

Kuniyoshi Takeuchi

Michael Hamlin

Zbigniew W. Kundzewicz

Dan Rosbjerg

Slobodan P. Simonovic

*The River Environment Fund of Japan provided  
financial sponsorship for this publication*

**Published by the International Association of Hydrological  
Sciences 1998**

IAHS Press, Institute of Hydrology, Wallingford, Oxfordshire OX10 8BB,  
UK

**IAHS Publication no. 251**

**ISBN 1-901502-60-0**

British Library Cataloguing-in-Publication Data.

A catalogue record for this book is available from the British Library.

**IAHS is indebted to the employers of all the Editors for the  
support and services provided.**

The designations employed and the presentation of material throughout the publication do not imply the expression of any opinion whatsoever on the part of IAHS concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

The use of trade, firm, or corporate names in the publication is for the information and convenience of the reader. Such use does not constitute an official endorsement or approval by IAHS of any product or service to the exclusion of others that may be suitable.

Files of the chapters provided by the editors were formatted in house style and assembled by Penny Kisby (IAHS Press, Wallingford, UK).

Printed in The Netherlands by Krips repro Meppel.

## CHAPTER 1

### Introduction

(edited by K. Takeuchi & D. Rosbjerg)

<b>1.1 Objective</b> <i>K. Takeuchi, Z. W. Kundzewicz, D. Rosbjerg &amp; S. P. Simonovic</i>	1
<b>1.2 Background and scope</b> <i>K. Takeuchi, Z. W. Kundzewicz, D. Rosbjerg &amp; S. P. Simonovic</i>	1
<b>1.3 Current status of reservoirs</b>	4
1.3.1 Number, size and shape of reservoirs <i>K. Takeuchi</i>	4
1.3.2 Land efficiency discussion of large reservoirs <i>K. Takeuchi &amp; S. P. Simonovic</i>	7
1.3.3 Reservoir sedimentation <i>K. Takeuchi</i>	9
1.3.4 Factors controlling the future needs of reservoirs <i>K. Takeuchi &amp; S. P. Simonovic</i>	10
<b>1.4 Critiques of present reservoirs</b> <i>P. Hjorth, Z. W. Kundzewicz, L. S. Kuchment &amp; D. Rosbjerg</i>	14
1.4.1 Introduction	14
1.4.2 Environmental effects of reservoir construction	16
1.4.3 Socio-cultural and institutional problems	20
1.4.4 Problems related to the use of reservoirs	22
1.4.5 Concluding remarks	25
<b>References</b>	28

## CHAPTER 2

### Sustainability and Reservoirs

(edited by K. Takeuchi & Z. W. Kundzewicz)

<b>2.1 Notions of sustainable development</b>	31
2.1.1 Introduction <i>K. Takeuchi &amp; Z. W. Kundzewicz</i>	31
2.1.2 Sustainable development: perspective of WCED and UNCED <i>K. Takeuchi &amp; Z. W. Kundzewicz</i>	31
2.1.3 Indicators of sustainability <i>Z. W. Kundzewicz</i>	36
2.1.4 Follow-up discussions of sustainable development <i>K. Takeuchi, S. P. Simonovic &amp; Z. W. Kundzewicz</i>	37
<b>2.2 Sustainable development and management in the reservoir context</b>	43
2.2.1 Introduction <i>K. Takeuchi &amp; Z. W. Kundzewicz</i>	43
2.2.2 Integrated water resources management <i>K. Takeuchi &amp; P. Hjorth</i>	44
2.2.3 Notion of multiple objectives <i>P. Hjorth, Z. W. Kundzewicz &amp; S. P. Simonovic</i>	47

2.2.4 Risk- and uncertainty-related considerations <i>P. Hjorth, Z. W. Kundzewicz &amp; K. Takeuchi</i>	51
2.2.5 Systems view <i>S. P. Simonovic</i>	54
2.2.6 Sustainability criteria for possible use in reservoir analysis <i>S. P. Simonovic</i>	55
2.2.7 Rationale of the checklist for sustainable reservoir development and management <i>K. Takeuchi</i>	58
<b>References</b>	60

### CHAPTER 3

## Comparative Assessment of Reservoirs with Non-reservoir Alternatives

(edited by Z. W. Kundzewicz)

<b>3.1 Introduction</b> <i>Z. W. Kundzewicz &amp; P. Hjorth</i>	63
<b>3.2 Multipurpose reservoirs versus alternatives</b> <i>Z. W. Kundzewicz, P. Hjorth &amp; K. Takeuchi</i>	64
3.2.1 Water demand and supply	66
3.2.2 Energy	72
3.2.3 Flood control	76
3.2.4 Other purposes	77
<b>3.3 Final remarks</b> <i>Z. W. Kundzewicz &amp; P. Hjorth</i>	78
<b>References</b>	80

### CHAPTER 4

## Design and Management of Reservoirs

(edited by S. P. Simonovic & K. Takeuchi)

<b>4.1 Introduction</b> <i>S. P. Simonovic</i>	81
4.1.1 Structure of the chapter	81
4.1.2 Dimensions of reservoir analyses	82
<b>4.2 Hydrological input for reservoir design and management</b>	84
4.2.1 Time series analysis of reservoir inflows <i>L. S. Kuchment</i>	84
4.2.2 Use of inflow forecasts for efficient management of reservoirs <i>K. Takeuchi</i>	89
<b>4.3 Methodological contributions to the design and management of sustainable reservoirs</b>	95
4.3.1 New method for the design of a sustainable reservoir <i>A. S. Kotula &amp; S. P. Simonovic</i>	95
4.3.2 Methodology for reassessment of existing reservoirs <i>S. P. Simonovic</i>	106
4.3.3 Methodology for net benefit allocation for reservoir redevelopment <i>N. Okada &amp; H. Sakakibara</i>	112
4.3.4 The least marginal environmental impact (LMEI) rule for reservoir sizing <i>K. Takeuchi &amp; M. M. Hufschmidt</i>	120
<b>4.4 Conclusion</b> <i>S. P. Simonovic</i>	124
<b>References</b>	126

## CHAPTER 5 Case Studies

(edited by D. Rosbjerg)

<b>5.1 Introduction</b>	<i>D. Rosbjerg</i>	129
<b>5.2 The Alta hydropower development scheme</b>	<i>N. R. Saelthun</i>	130
5.2.1 Introduction to the Alta case		130
5.2.2 The river		130
5.2.3 Undercurrents in society		132
5.2.4 The Alta hydropower scheme		134
5.2.5 "The Alta affair"		136
5.2.6 Impacts of reservoir development		138
5.2.7 Design and management of reservoirs		140
5.2.8 Comparative assessment of the reservoir with non-reservoir alternatives		141
5.2.9 Sustainability issues		141
<b>5.3 Aswan High Dam</b>	<i>H. Fahmy</i>	142
5.3.1 Introduction to the Aswan case study		142
5.3.2 Inundation of populated areas		144
5.3.3 Sedimentation problems		147
5.3.4 Conclusion on the Aswan case study		150
<b>5.4 Management of annual peak flows to restore aquatic resources in Green River, Utah</b>	<i>E. D. Andrews &amp; L. A. Pizzi</i>	151
5.4.1 Introduction to the Green River case study		151
5.4.2 Historical development of Colorado River basin water resources		153
5.4.3 Hydrology of the Green River basin		155
5.4.4 Ecological and geomorphological alteration of the Green River		161
5.4.5 Anticipated benefits of increased flood magnitude and duration		163
5.4.6 Conflicts and opportunities for increased flooding		164
5.4.7 Conclusion on the Green River case study		166
<b>5.5 Projects undertaken to achieve sustainable development of dam reservoirs in Japan</b>	<i>S. Ikebuchi, N. Okada &amp; H. Sakakibara</i>	167
5.5.1 Introduction to the Japanese reservoir policy		167
5.5.2 Projects related to sustainable development of reservoirs		167
5.5.3 Legal arrangements for social impacts of dam construction projects		169
5.5.4 Water quality conservation measures for dam reservoirs		170
5.5.5 Rehabilitation of an existing reservoir		171
5.5.6 Improvement of the management and operation of dam reservoirs		173
5.5.7 Regional promotion and regional planning centred around dams		174
5.5.8 Other issues		177
5.5.9 Conclusion on the Japanese study		178
<b>5.6 Concluding remarks on the case studies</b>	<i>D. Rosbjerg</i>	179
<b>References</b>		180

## CHAPTER 6

**Checklists and Concluding Remarks***K. Takeuchi, Z. W. Kundzewicz, D. Rosbjerg, S. P. Simonovic*

<b>6.1 Checklists for sustainable reservoir development and management</b>	183
<b>6.2 Concluding remarks</b>	187

---
