

## Key word index

- analysis, regression, 151
- arsenic, 57
- assessment, ecological, 43
- bedrock influence, 113
- BENIFOR, 31
- birds, 101
- case study, 139
- chalk stream drought, 151
- coastal erosion, 19
- community, macroinvertebrate, 151
- dams, 19, 101
- data collection, 1
- debris, large woody, 91
- degradation, 101
- delta, Niger, 19
- digital terrain modelling, 65
- drought, 101
  - chalk stream, 151
- dynamic equilibrium, 19
- ecohydrology, 1
- ecological
  - assessment, 43
  - impact, 51
  - safety, 139
- ecology, 19, 77, 101
  - freshwater, 1
- eco-quality standard, 139
- environmental impact assessment, 1, 139
- equilibrium, dynamic, 19
- erosion, coastal, 19
- fisheries, 65
- flood plain, 51
- flooding, 101
- flood-plain habitats, 51
- flow, 31
  - flow conditions, instream, 43
- Forest of Dean, 91
- freshwater ecology, 1
- geochemistry, 57
- geomorphic change, 113
- geomorphology, 77
- Germany, 51
- GIS, 51, 65
  - and remote sensing, 101
- habitat(s)
  - flood-plain, 51
  - instream, 31
  - modelling, 65
  - physical, 91
  - prognosis model, 43
  - requirements, 43
- hydraulic modelling, 65
- hydro-ecology, 1, 43, 151
- impact
  - assessment, environmental, 139
  - ecological, 51
- instream
  - flow conditions, 43
  - flow requirements, 113
  - habitat, 31
- integration, 65
- interdisciplinary science, 1
- intrusion, saline, 19
- invertebrate, 31
- Jonglei Canal, 125
- Kruger National Park, 77
- large woody debris, 91
- low flow, 151
- Lower Rhine, 51
- LWD, 91
- macroinvertebrate(s), 43
  - community, 151
- mayfly, 31
- mesoscale, 51
- methodology, 139
- Mexico, 57
- mining, 57
- model, 77
  - habitat prognosis, 43
- modelling, 1, 51
  - digital terrain, 65
  - habitat, 65
  - hydraulic, 65
- morphology, 19
- mountain rivers, 31
- Niger delta, 19
- pattern recognition, 139
- pH, 57
- PHABSIM, 91
- physical habitat, 91
- planning, reservoir, 43
- predict(ion), 1, 77
- prognosis model, habitat, 43
- regression analysis, 151
- remote sensing and GIS, 101
- reservoir planning, 43

Rhine, Lower, 51  
river(s), 65  
    modification, 19  
    mountain, 31  
    regulation, 1  
    semiarid, 113  
    stage variation, 51  
riverine, 19  
Sahel, 101  
saline intrusion, 19  
scale, 77  
secondary production, 31  
sediment(s), 57  
    delivery, 19  
semiarid  
    region, 139  
    river, 113  
siltation, 101  
spatial characterization, 65  
stage variation, river, 51  
Sudd, 125  
sustainability, 139  
tailings, 57  
two-dimensional habitat, 65  
vegetation, 51  
    control, 125  
western China, 139  
wetland(s), 19, 101  
    balance, 125  
Zimapán, Mexico, 57
