

Preface

This book is comprised of a selection of papers presented at an international symposium held on 7 and 8 July 2003, during the XXIII General Assembly of the International Union of Geodesy and Geophysics (IUGG2003) at Sapporo, Japan.

The conference was convened by:

- the Commission on Water Quality of the International Association of Hydrological Sciences;
- UNESCO's International Hydrological Programme;
- the Commission on Management of Aquifer Recharge of the International Association of Hydrogeologists.

The editors are indebted to Peter Dillon from the International Association of Hydrogeologists Commission on Management of Aquifer Recharge, for his cooperation in organizing the symposium, and to Karel Hulsteijn from Wageningen University and Research Centre, Alterra, for the design and assemblage of the front cover.
