Key word index

^{14}C, 49
^{18}O, 49
^{2}H, 49
^{3}H, 49
accuracy of precipitation measurement, 88
adaptation, 201
agricultural
  drought characteristics, 246
  water management, 117
agriculture, 67
ancient literature, 160
Andes, 284
aqueducts, 31
Aral Sea basin, 300
aridity index, 255
awareness raising, 109

biodiversity, 268
biological assessment, 268

central
  Europe, 77
  Italy, 31, 67
China, 284
Chinese indigenous philosophy, 150
civilization, 277
civilization
  development of, 77
  India, 160
civilizations, 284
climate change, 291
climate change impacts, 201
climate, 217
climatic trends, 255
climatology, 125
conservation assessment, 268
crop yield, 246
cultural
  development, 160
  theory, 135
customary international law, 291

dams, 284
Danube basin, 178
degradation of the Aral Sea, 300
design philosophy, 13
development, 210
development
  of civilization, 77
disasters, 284
drainage, 178
drought, 217
Dujiangyan, 195

early water balances, 3
ecohydrology, 88
ecological risk, 13
economic
  efficiency, 135
  incentives, 291
ecosystem, 268
education, 109
Egypt, 284
empirical and rational approaches, 3
environmental
  isotopes, 125
  services, 135
equitable utilization, 291
ethical approach, 150
Europe, central, 77
extreme events, 201

flood
  control, 150
  protection, 13, 178, 201
floods, 31, 95, 201, 228
freshwater, 135

geological–geomorphological models, 322
global changes, 201, 255
groundwater management, 67
growing season, 300

historical source, 95
history, 49
history
  of hydrology, 3
holy rivers, 160
Hong Kong, 23
hydraulic
  energy, 31
  mission, 135
  science, 31
hydrogeological research, 322
hydrogeology, 49, 67
hydrological
  cycle 3, 88
  risk, 95
hydrology, 49, 88, 125, 210, 238
hydro-politics, 135
hydropower production, 300

identity, 315

impact upon society, 23
integrated
  approach to development, 322
